

Sickle Cell Test Instructions

Quest Diagnostics and PWN Health

The NCAA has set up a testing alternative with Quest Diagnostics and PWN Health to provide the Sickle Cell Trait (SCT) test at a significantly reduced rate to all NCAA student athletes. You will need to go directly to the PWN Health website (<https://sicklecelltesting.pwnhealth.com/order/am>)* to generate the test order, pay a **one-time \$32.50 fee by credit card** for the SCT screening test and print a Quest Diagnostics test requisition form. If you test positive for the SCT, you will be required to take a reflex test to confirm that you carry the SCT, which is an additional \$43. (The confirmation test for positive test results can be found at www.confirmationtest.pwnhealth.com/order/am.)* PWN Health will provide the Doctor's authorization after ordering the SCT screening test.

Please note that you must be 18 years of age to register for the test (it cannot be registered using a parent's name and birthday). After you place the order, you will receive an email with your CONFIRMATION CODE. We stress that is important to save this email because it will contain your password to retrieve your order and results when they are available.

You will receive an email within 12 hours saying that the order has been approved, but the email can get lost in your spam folder. You can log into the website <http://www.sicklecelltesting.pwnhealth.com/order/login> * to retrieve your order 12 hours after it is placed. **Please note that this is a different URL than the one used to place the order.** You will need to enter your last name and confirmation code to log in. Once logged in, there will be a link that says "download and print your lab order". This is the pdf that you will need to print and take with you to Quest Diagnostics to have your blood drawn.

Your results will be available 2-5 days after having your blood drawn. Once again, an email notification will be sent, but it can get lost in your spam folder. Please make sure to log back into the website after 5 days if you have not received the results email. If you log in after 5 days and do not see a link that says "download and print your results", please call 1-888-362-4321 ext 0 for help.

Below is the information for the closest Quest Diagnostics to campus along with their address, telephone number, website and hours of operation. I suggested you make an appointment via their website or call to schedule an appointment to have your blood drawn.

***Please note, there may be a security certificate notification when using these links. Please just proceed to the websites using Advanced Options. You may also ask for assistance in the Athletic Training offices.**
